

## Character Document Sample 2:

### Penelope – (Sci-Fi)

**Full Name:** Penelope Circledot

**Age:** 15

**Gender:** Female

**Hair colour:** Blonde

**Eye colour:** Green

**Race:** Human (Sapient)

**Planet Origin:** Star-Core

#### **Personality:**

Exaggerated, cranky, over thrilled, loud, short-fused, a little egotistical, unhygienic, dirty.

#### **Short Summary:**

A prodigy of mechanical engineering and piloting, though sometimes reckless and often throw a temper tantrum when things are not getting her way, but overall likes to challenge herself to create the best gear and vehicles to help out her friends.

#### **Quotes:**

“It’s only a bio-mechanical, hive-type claw hugger, it won’t bite... maybe.”

“Aghhh, why won’t this piece of scrap work?! Work scrapdangit!”

“Are you kidding? You’re talking to someone who was raised by robots, literally!”

#### **Bio:**

Born from the prosperous and peaceful core world of the Star-Core Republic, it was unfortunate that Penelope’s early life left her in a harsh environment underneath the surface. Her parents abandoned her when she was a baby, thrown into the planet-wide terrible compactor where she finds herself at the Landfill where all the trash and unwanted stuff is collected, recycled, and reused. The rodroids found her wrapped around a blanket with the words ‘Penelope’ on it. Though their programming is to sort out unwanted trash, the robots take upon themselves to adopt and cater for the child.

Penelope grew up, living on uneaten garbage, breathing toxic and chemical smog, and covered in dirty matter. Despite all odds, not only she survived and adapted to her home, but enjoyed her life underground.

She grew up aiding the robots, but caught an interest in drobotics and engineering, she self-taught how to repair rodroids, aided in fixing abandoned contractions, both thrown away and in the assembly line of sorting out the trash. What would have taken weeks for a single mechanic to come down to the underground, repair the broken contraction and come back to the surface, Circledot did it as soon as she spots the problem.

Eventually her interest was to climb out of the underground and reach the surface to find more challenges and broken stuff to fix. When she found an old hoverbike in a big trash pile, in that moment, she found her opportunity. Fixing it and putting additional adjustments, Circledot spent months learning how to ride the bike, after trial and error and constant repeat of repairs for both the bike and herself, she eventually managed to professionally drive the bike, with enough power to drive upwards to reach the surface.

Finding herself above her home, she set out to find new work and explore a much wider galaxy than she expected.

### **Appearance:**

Penelope has big, messy blonde hair that hasn't been washed or taken care of, with goggles on her forehead.

She has green eyes and dirt around her face, she has yellow teeth with one looking sharp as a vampire fang.

She wears a turquoise bib overall over a green shirt, with white, yellowish Tempskin exposed on her arms, with big dark grey boots that looks like wellies.

Her body is small and short, not as small as a 5-year-old, but shorter than the average female teenager.

### **Out-universe information:**

This character was originally created for a Sci-Fi Adventure Teen Novel where she is the Tritagonist for the story.

The following words comes from the novel concept, and used here for clarification:

**Sapien** – The Star-Core's name for Humans and Homo Sapiens, the word 'Human' has never been used in their civilization.

**Star-Core** – a planet shaped as third-dimensional four-pointed star, the founding planet for Sapiens and the heart of their galaxy-wide republic, note: Star-Core is not Earth.

**Rodroids** – robots

**Drobotics** – robotics

**Tempskin** – a full-body skinsuit that goes up to the user's neck, the user's wrists, and the user's ankles, they are a layer of skin that provides heating and cooling to match the right temperature for the user, even if they are on a planet with extreme weather.
