

1 This game relies **very heavily** on memory. You need to remember what you start with and keep track of both your hand and the hands of your opponents as they change, as well as where the Queens are.

2 You can only call parlay if your hand totals five or less.

3 If you finish with all 4 queens, your score gets 0. Losers get their totals +20.

4 If you think you have less than who called it, you can challenge them. Winner gets 0. Loser gets their totals +20.

5 Only one match can be flipped up at a time. Be quick about it.

When a player calls parlay, everyone else has one last turn to get their totals down as much as possible.

Multiple decks may be needed for games with more than four players.

If you call parlay and your hand totals above 5, it's counted as a **false parlay** and has the same penalty as losing a challenge.

If you call parlay and your hand totals above 5, it's counted as a **false parlay** and has the same penalty as losing a challenge.

you have to completely raise your hand when discarding a queen, to make sleeping more fair.

**POWER CARDS**

- Q = swap, don't look
- J = swap, don't look
- 10 = look at 2 cards, then swap it
- 9 = look at 2 cards in your hand
- 8 = look at 2 cards in your hand
- 7 = swap, then look at what you got
- 6 = swap, then look at what you got

**RULES**

- Whoever calls parlay cannot be swapped with.
- In the event of a tie during a challenge, defender wins.
- Rule of Commitment for 10s. What you look at is what you give.
- You can't rearrange your hand.

1 You can **flip up cards** from your hand to remove a spot and lower your total.

2 You can also smack someone else's card if you think it matches what's on the top of the discard pile. If it matches, whoever you slapped adds 2 cards to their hand. If it doesn't, you add 2 cards.

3 You can also smack someone else's card if you think it matches what's on the top of the discard pile. If it matches, whoever you slapped adds 2 cards to their hand. If it doesn't, you add 2 cards.

4 CAN mess with the remaining players. Losers cannot win, but they CAN mess with the remaining players.

5 If you go over 50 points, you lose. Exactly 50 points is still in the game. Losers cannot win, but they CAN mess with the remaining players.

6 The winner is the last man standing.

MINIMUM # OF PLAYERS: 2

# HOW TO PLAY

PARLAY is a Polish card game.

Not much info about it exists online, so I made this zine about how to play!

# OTHER RANDOM STUFF

## EVEN MORE RULES

# HACK OS

I hope you enjoyed learning how to play a new card game or using this zine to teach someone else to play.

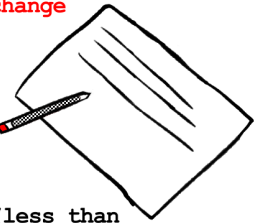

May you enjoy it as much as my family has since we started playing.

Flipping up a queen, then matching another renders both queens unslappable.

Cards can be in any orientation, as long as they **don't change places** during the game.

You aren't allowed to write down your cards to remember them better.

Uneven shuffles (less than 6-7 riffles) are usually more interesting.

# HOW TO PLAY PARLAY

For queen slapping, whoever's hand is on the bottom of the pile gets it.
