YAY

I have to be realistic and have low expectation with Pokemon now, but some concepts I think would be great

- Pokemon Party game, or a Fun game with modes similar to Dash, Ranch, Amie and ect. etc. its meant to be pure fun and silly. Maybe all parts are in Pokescape?

- New ~~Stadium~~ Stadium / Battle Rev since VGC is such a big focus. It could allow players to experiment w/ build bonus if challenge and weird battle modes are implemented in any game. let battles be weird as fuck and not simply VGC standard!!

Stuff i want to
work on:

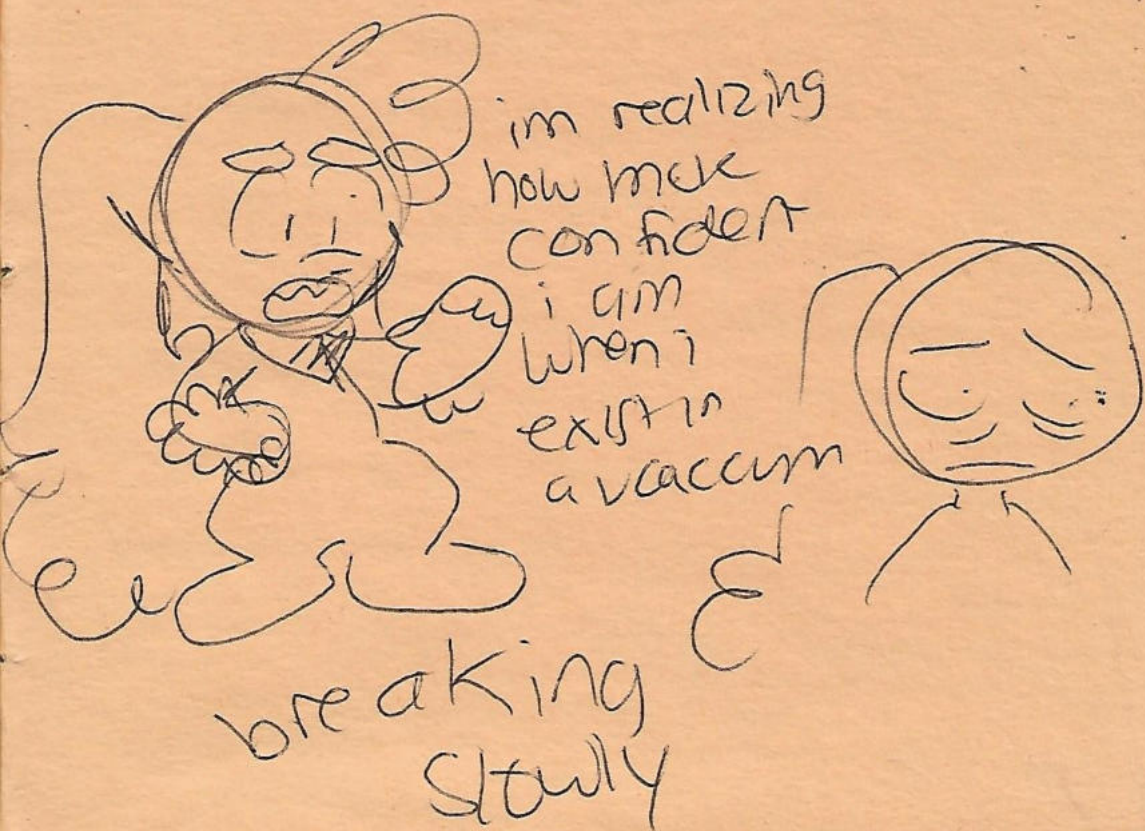

- ▷ regulating
myself
- ▷ not fawning
- ▷ self confidence

- I don't worry about
being judged or looking silly
I worry more about people
trying to hurt me (yell, isolate, injure)
I know I'm silly and that ok
It's aggression that scares me
* I can't accept affection but I fawn
and it pisses me off
