CAN YOU
TELL ME
WHAT YOU SEE?

Michelle Tran
GRPH-3018

Sometimes, we see familiar shapes in things that don't look normal at first.

But today, we will show some drawings to ask people what they see in them.

Let's see what they see.

Now, can you tell me what you see?

“I think I see a bird!”

“A butterfly!”

“I’m not sure what that is.”

“A bear!”

“No! I see two elephants!”

“I don’t like this one very much.”

“They look like two people.”

“What are they talking about?”

“Oh I see a bug!”

“I do too!”

“I think I see two animals
fighting with each other.”

“Those are two pretty ladies.”

“They look like good friends!”

“I don't think they look so happy.”

Last one.

“This one is pretty! It reminds me
of the ocean.”

“I can see some crabs.”

“This one is weird!”

So many answers for what we may see.

There are many reasons for why we
see things the way they are.

But can you tell me what do **YOU** see?

WHAT YOU SEE?
LET ME
CAN YOU
